BE-Ready Compact

MOOSMOAR ENERGIES OG

# Preparing teams for real emergencies

A compact 3-hour outdoor format for companies:
Are you and your team prepared when quick action is required?

**A different kind of company outing makes it possible!**

## Event Content:

**1) Introduction & Objectives**

Warm-up, clarification of roles, objectives and rules

**2) Introduction to the Model & Risk Basics**

Short input on the model and risk factors

**3) Practical Core: Crisis Simulation at the Demonstration Model**

Self-organised employee teams jointly manage a flooding scenario with unexpected escalations.

The focus is on communication, coordination, prioritisation and decision-making under time pressure.

**4) Debriefing & Transfer into Everyday Work**

Reflection: What worked well, what did not?

**Outcome:** Three team rules that can be applied in everyday work from the very next day.

## Experts:

**Dr. Wolfgang Prüggler**

**(Moderation & Team-Resilience)** - Guides participants through the format, manages the simulation and evaluation, and supports the team in deriving three practical team rules.

**Dr. Natalie Prüggler**

**(Adaption & Prevention)** - Explains the logic of natural hazards and prevention, and translates learnings into implementable measures.

## Overview:

**Number of participants:**
Ideally 10 to 20 people

**Duration:** Approx. 3 hours

**Location: Wassererlebnis Öblarn**
Start: Öblarn (Railway station or main square)

**Included:** Model rental including covered wagon transfer and moderation. Optional: Sandwiches, cold and hot drinks, cake

**Costs 2026 (net):**
**2.490 €** (Model use and content design)

**Catering guideline prices (3h):**
Drinks: €5 per person
Sandwiches: €9 per person
Cake: €4 per person

## Target Group:

- Management / site or operations management
- Team leaders / employees
- EHS / occupational safety, safety officers
- Facility / maintenance / building management
- Logistics / vehicle fleet / supply chain, dispatching
- Communication / HR

## Your Benefits:

· Shared language for risk, situational awareness and priorities

· Trained communication and decision-making routines

· Greater confidence in collaboration: fewer misunderstandings and faster coordination

· **Three team rules** plus clear next steps for everyday work

## Content in Detail:

During the **3-hour BE-Ready Compact session**, teams from companies and organisations are prepared in a **highly practice-oriented** way to remain capable of **taking action under time pressure** when unexpected events occur. The clear focus is on **roles, coordination, decisions and communication**.

The format is also **suitable as a company outing with a fun factor,** where a shared experience is directly translated into concrete improvements for everyday work.

A compact theory and orientation block is included, covering **the basics of natural hazards such as heavy rainfall and flooding, escalation mechanisms such as log jams, and key principles of effective solution strategies.**

The core element is a **moderated crisis simulation** at the demonstration model. Participants organise themselves and jointly manage an event with **escalation stages**, such as flooding or triggered bottleneck situations. The goal is to quickly establish a situational picture, set **priorities**, and make important **decisions** in a transparent and efficient way.

The scenario is simulated realistically at **Wassererlebnis Öblarn** and can be **adapted** to the industry context or **typical processes** of the participating organisation. The session concludes with a structured evaluation and transfer phase.

**The outcome:** Three concrete team rules that can be applied immediately in everyday work.
